

# Plant Audits

icc

## On-Site Plant Audits

### Let Us Help Before the Inspector Visits!

Our comprehensive safety audits and inspections are competitively priced and are an optimum way of increasing safety awareness in your workplace; ensuring peace of mind that you and your organization are complying with all Occupational Health and Safety requirements. Professional Occupational Health and Safety management helps to protect businesses, workers, the general public and families from the trauma of accident and tragedy.

### On-Site Plant Audits

While we at ICC Compliance Center can't prevent an inspection, we can certainly help you pass it with flying colors. We offer complete in-house plant audits of your facility by one of our regulatory specialists. We analyze your needs and inspect your facilities for compliance with various transportation (DOT/TDG, IATA, IMDG) and workplace (OSHA/WHMIS) government regulations.

### Plant Audits Save Time and Money

Let ICC perform an audit and identify areas of non-conformance or make suggestions for improvement, before the inspector does.

Let ICC evaluate the following:

- Packaging Standards
- Labeling of packages and containers for WHMIS, OSHA, 49 CFR, TDG Clear Language, and GHS
- Shipping Documentation
- Safety Data Sheets (SDSs)
- Health and Safety
- Safety Signage
- Workplace Labeling
- Potential Risks
- Security
- GHS Implementation

## How it Works

Once the inspection is complete, the regulatory specialist will draft an extensive report including specific recommendations including any exemptions to ensure full compliance. These also include any exemptions from which you may benefit. Your account manager will then review the report in detail with you, help you understand our findings, and select the appropriate services to solve any problems. If necessary, the regulatory specialist can assist the account manager in delivering the report to a group, so the information is properly understood by all involved.

## Key Benefits

- You have a complete picture of your compliance situation
- You obtain the tools to meet the requirements of the various regulations and receive suggestions to streamline your shipments
- You can present a plan of action to any inspector who walks in unannounced
- You now have a partner in compliance to help you with all your hazardous materials needs

## Plant Audit Programs

### Occupational Health and Safety Advisory Service

As an employer you are required to manage and control the numerous risks and hazards associated with your industry, and must also be aware of the ramifications of the Acts, Codes and Regulations that govern your workplace. Penalties, fines and punitive litigation for breaches of Occupational Health & Safety and Transportation and the resulting injuries are substantial.

### Online Safety Audit Webinars

Learn how to deliver structured internal audits. Whatever the size or nature of your organization, quality occupational health and safety training is vital to its success. Build employee confidence through optimum working standards and continuous improvement. Learn how to prepare and plan internal occupational health and safety audits.

### Audit Forms

Getting ready to audit your facility? Ask us about our On Site Risk Analysis Audit Forms for various industries.

### Occupational Health and Safety Manuals

Complete Canadian and US Safety Manuals are available that meet and exceed all federal, provincial, and OSHA regulations. The DVD manual contains over 50 programs including operating procedures, chemical handling, ergonomics, ladder, heat stress; PPE, violence and harassment in the workplace, training records, etc. Also included are PowerPoint presentations for training and a disaster response emergency preparedness program.

### Workplace Violence and Harassment Package

We offer a complete set of programs to address violence and harassment in the workplace.

### Programs

- Workplace Violence, Domestic Violence & Harassment Information
- Occupational Health, Safety, Workplace Violence & Harassment Policy Vision Statement
