

Variation Packaging

ICC The Compliance Center Inc. has a full line of stock  Performance Packaging kits. Whether you require glass, plastic, or metal containers, paint can shippers, intermediate packaging, or single containers, we have the product and service to support your needs.

The PK-GLG28IN kit, pictured here, is designed to hold a 128 oz glass bottle and the necessary absorbent material. The included insert to this kit reduces the amount of absorbent, while keeping the outer box as compact as possible.

Because this kit has been tested under variation 2, it is very versatile. Variation 2 (49 CFR 178.601 (g) (2), IATA 6.3.1.3, ICAO 6;4.1.7) allows you to test the package so that you may use the outer box with any inner container, provided that minimum cushioning distances are maintained.

For complete pricing, see our order form on the reverse side of this promotion. If you would like more information, or to place your order directly with a customer service specialist call 888-442-9628.
